MOTOR YACHT TANKOA 45M 2027

FLAG -

MOTOR YACHT

T450

A four-deck yacht from the Italian shipyard **Tankoa** with exterior design by **Francesco Paszkowski** and interior by **Giorgio Cassetta**. Strict straight lines and maximum functionality, as well as thoughtful technical solutions are the key principles of this model.

Powertrain. The project provides two solutions: a classic version with MAN diesel engines and direct shaft and a hybrid version with diesel engines, electric motors and generators with increased power. The hybrid version allows a significant reduction in fuel consumption and has a longer cruising range (4,000 nm - transatlantic range).

Layouts. In general, the yacht reflects all current market trends, but a number of features deserve attention. There is a layout with two cabins on the main deck (master and VIP) and a galley on the lower deck. Combining these two cabins into one allowed the project to be built with an owner's suite, which is also in demand when it comes to long cruises and passages. A storage area (with crane) for a large tender and jet ski is located forward, while seabobs, kayaks and other gear are stored aft under the swim platform.

More and more customers want the ultimate open beach club that can be fully integrated into a single cockpit and saloon space, instead of the standard cockpit solution behind the main saloon. On the **T450** there is such an optional aft layout (on request).
