YXT 27

YXT 27 is a 27.4-meter multipurpose support vessel built by **Lynx Yachts** in collaboration with Outer Reef. Developed in response to owners seeking a rugged yet comfortable platform, it offers solid construction, customization potential, and the autonomy required for long-range cruising or serving as a versatile companion to a superyacht.

The steel full-displacement hull, 7.1-meter beam, and 140 GT volume provide stability and generous space. The main deck is engineered to carry a wide array of equipment - from tenders and jet skis to submarines, helicopters, and off-road vehicles. At the stern, the vessel features a beach club with a fold-down Opacmare platform, which extends the relaxation area and enables easy water access.

The yacht's interior layout is fully customizable. The standard configuration includes a guest cabin with a spacious steam shower across the hall, a fully equipped galley, and ample storage areas. The bridge deck houses the main helm with 360-degree visibility and a relaxed lounge behind the wheel, ideal for navigation or enjoying the view. Toward the aft, there's a fitness area with a large hatch that provides natural light and ventilation. Nearby, there's an ironing station and extra storage.

Powered by twin diesel engines, **YXT 27** reaches a cruising speed of 12 knots and has a range of approximately 1,900 nautical miles. With a shallow draft of just 1.8 meters, it can access shallow bays and remote anchorages with ease.

Compliant with Outer Reef's high international standards, **YXT 27** is a dependable and flexible support yacht, well-suited for technical support, guest services, or even independent exploration.
