AB 130

AB 130 is a 39.65-metre motor yacht designed with a focus on speed, modern aesthetics, and intelligent spatial use. Built entirely from lightweight composite materials, she is powered by three MTU 16V2000 M96L engines paired with MJP waterjets, allowing her to reach an impressive top speed of 41 knots. Classified for unrestricted navigation and ready for SCR (Selective Catalytic Reduction) installation, she is well-suited for more environmentally conscious cruising routes. At the stern, AB 130 features a transformable area with fold-down terraces positioned right at the waterline — ideal for lounging and quick access to the sea. The garage is designed to store two tenders or a full suite of water toys, with a unique lifting system that enables towing the tender directly inside, a rare feature in yachts of this size.

She offers accommodation for up to 10 guests across five cabins. The flybridge is an open, versatile space that can be arranged as a lounge or al fresco dining area, complete with a retractable roof for flexible use in different conditions.

With a shallow draft of just 1.3 metres, **AB 130** is perfect for exploring secluded anchorages and shallow bays. Despite her sleek profile, there's ample room onboard for a beach club and multiple social areas. Two gyroscopic stabilisers — Seakeeper 26 and Seakeeper 9 — ensure smooth cruising and stability at anchor.

AB 130 is equally suitable for private ownership or as a fast support yacht or day cruiser platform, offering a powerful blend of performance, comfort, and practical innovation.
