SUNREEF 43M

Sunreef 43M represents a new generation of sailing superyachts, combining innovative technology, eco-conscious engineering, and superyacht-level comfort. This 43-metre sailing catamaran offers expansive living spaces, cutting-edge technical solutions, and full customization options to match the owner's vision. Available in both the standard and Eco versions, the latter features **Sunreef's** patented solar skin—over 250 m² of integrated solar panels generating up to 60 kW of clean energy. Combined with a 1 MWh battery bank and an electric propulsion system, the **Sunreef 43M** delivers quiet, emission-free cruising and exceptional energy efficiency.

A standout feature of the design is the aft cockpit, which transforms into a beach club with fold-down terraces and a swim platform directly connected to the gym and water sports area. Beneath the cockpit lies a garage for two jet skis with an integrated refueling system.

Accommodation is provided for 12 guests across six cabins, including a panoramic owner's suite with direct access to a private foredeck terrace featuring a spa pool. The flybridge hosts a sunbathing area, bar, and open-air cinema, offering an elevated social experience.

With its lightweight composite construction, hybrid energy systems, and smart spatial design, the **Sunreef 43M** redefines the sailing supercat segment — merging efficiency, silence, and sustainability in one visionary vessel.
