SUNREEF 40M EXPLORER

Sunreef 40M Explorer is a next-generation expedition super catamaran, designed for long-range adventures with a focus on comfort, autonomy, and innovation. Built by **Sunreef Yachts** in Poland, it combines exceptional seaworthiness with vast living areas and a fully customizable layout to suit the owner's lifestyle.

Measuring 40 meters in length with a 13.34-meter beam, the yacht offers more than 650 square meters of interior and exterior living space across three decks. Thanks to her wide hulls and shallow draft of only 1.9 meters, she can safely access remote anchorages and shallow bays. A hybrid propulsion option allows for quiet, efficient cruising with a transatlantic range.

The aft deck serves as a multifunctional leisure and storage area, equipped with a crane for a 7-meter tender, jet skis, and water toys. A hydraulic swim platform lowers to form an expansive beach club at sea level.

Accommodation is provided for 10 guests in five suites, including an owner's suite that can feature a private fold-down balcony. The seven crew members are housed in five separate cabins for optimal service and privacy. The interior layout can be tailored to include a spa area, hammam, gym, cinema, or even a game lounge with a billiard table.

Outdoor living is at the heart of the design, with a flybridge featuring a jacuzzi and bar, a forward terrace, and an innovative Ocean Lounge that offers direct access to the sea along with dedicated storage for diving and e-foil equipment.

Blending explorer capability with superyacht refinement, the **Sunreef 40M Explorer** redefines sustainable luxury cruising for global voyagers.
