APOLLO 99

Sunreef 80 Eco APOLLO 99 is a next-generation 23.87-meter sailing catamaran, launched in 2023 by **Sunreef Yachts**. With an impressive beam of 11.53 meters and a composite hull, **APOLLO 99** delivers exceptional lightness, strength, and efficiency — both under sail and electric propulsion.

The interior, designed by BALO Design, embraces a minimalist aesthetic with natural materials and full-height panoramic windows that flood the space with natural light. The spacious main salon seamlessly combines a lounge and dining area, creating an open, elegant atmosphere.

Accommodation is provided for 8 guests in 4 cabins, including a full-beam owner's suite with a walk-in wardrobe, private office area, and en-suite bathroom. Crew quarters for up to 4 are located in separate cabins to ensure guest privacy.

The exterior decks offer a cockpit with a bar and dining area, a hydraulic swim platform that transforms into a beach club, and generous storage for water toys.

APOLLO 99 is powered by a fully electric propulsion system supported by a 45.5 kW solar array integrated into the hull, superstructure, and mast — covering 164 square meters in total. This technology enables remarkable energy efficiency and silent, emission-free cruising.

Built using eco-friendly materials, **APOLLO 99** represents a new era of sustainable luxury sailing — combining cutting-edge innovation, refined design, and true environmental responsibility.
