MOTOR YACHT

LADY LU'

The **Sanlorenzo SL120A LADY LU'** is a motor yacht exemplifying the shipyard's approach to innovative design and functionality. Launched in 2023 as the ninth hull of the **SL120A** series, she combines high build quality, efficient layout, and the shipyard's signature asymmetric design.

The hull and superstructure are constructed from GRP, measuring 36.92 m in length and 7.6 m in beam. Thanks to the asymmetric layout by Zuccon International Project, the yacht benefits from enhanced interior volume and a direct connection to the sea via panoramic windows and a fold-down balcony in the main salon.

Interiors feature a minimalist contemporary style with natural materials and neutral tones. Accommodation is arranged for 10 guests in five cabins, including a full-beam master suite and four guest cabins with ensuite bathrooms. The six-crew layout is located in separate living areas with independent access.

Powered by twin MTU 16V 2000 M96L engines, the yacht reaches a maximum speed of 27 knots and a cruising speed of 23 knots, with a range of approximately 545 nautical miles.

Exterior decks feature spacious teak-laid lounging areas, including the aft terrace, foredeck lounge, and upper deck, all designed for guest comfort and privacy.

With minimal engine hours, RINA classification, and excellent technical condition, **LADY LU'** represents a rare opportunity in her class - a modern, dynamic, and meticulously designed yacht, fully ready for immediate use.
