## EXPLORER 50

**Explorer 50M** is designed as a true long-range vessel, engineered to navigate both polar and tropical regions with equal endurance. Her steel hull provides the reliability required for remote cruising, while large windows, thoughtful deck geometry and expansive terraces allow the onboard spaces to feel open, functional and closely connected to the surrounding environment. Wide side decks, open exterior areas and a touch-and-go helipad expand itinerary possibilities. Forward, a panoramic observation lounge offers a sheltered vantage point with sweeping views - an ideal space for wildlife watching and scenic passages.

Accommodation includes a full-beam owner's suite on the main deck, along with two VIP cabins and three guest cabins on the lower deck, each equipped with its own ensuite. A beach club, spa area and upper-deck dining terrace add structure to life on board, creating distinct zones for spending time by the water, indoors or in the open air.

Technically, the yacht is built for autonomy. Twin MAN engines deliver a cruising speed of around 13 knots and a range of up to 4,000 nautical miles in economical mode. With a volume under 500 GT, **Explorer 50M** remains agile and operationally flexible while maintaining the stability expected from an expedition vessel of this class.

**Explorer 50M** brings together range, functional architecture and rugged capability, offering owners and guests not only the freedom to explore remote regions, but also the privilege of experiencing the world in its most natural form.
