60 Z

ADA 60 Z is a 60-metre steel and aluminium motor yacht designed by Uldas Yacht Design and built by Ada Yacht Works - a project that stands among the most significant in the Turkish superyacht segment. Hull #2 is available for purchase with delivery in 2028, giving a future owner the rare opportunity to shape key decisions regarding interior style and onboard equipment.

The yacht's architecture is defined by clean geometry and carefully orchestrated deck layouts. Three pools, positioned across separate decks, create varied outdoor living scenarios. A touch-and-go helipad sits on the upper deck, while one of the yacht's signature elements is the open beach area on the main deck - a wide, unobstructed space that maintains a seamless connection to the sea and expands the potential for custom lounging zones.

The interiors embrace a contemporary design language built on natural materials, soft tones and precise, understated geometry. Accommodation is arranged for 12 guests in six cabins, including two master suites, one of them occupying a privileged position on the upper deck.

Designed for long-range cruising, **ADA 60 Z** is powered by twin Caterpillar C32 engines, delivering a cruising speed of 12 knots and a maximum of 15 knots. Fuel capacity reaches 130,000 litres, supporting a range of up to 4,500 nautical miles. The draft is optimised for a yacht of this length, allowing access to protected bays and marinas that are off-limits to many vessels in this size category.

ADA 60 Z brings together contemporary architectural thinking, strong autonomy, flexible layout possibilities and an extensive scope for customisation - offering a platform that future owners can shape to their own vision.
