MOTOR YACHT

FLY 60

Azimut Fly 60 is a flybridge motor yacht designed for comfortable family cruising and entertaining, with a strong focus on efficient use of space. With an overall length of 18.25 metres and a beam of 5.05 metres, she delivers volumes and functionality typically found on larger yachts, while remaining well balanced and easy to handle for coastal cruising.

The main deck is conceived as a continuous living space, with a choice of galley configuration - either forward or aft. This flexibility allows the interior layout to be tailored to different usage scenarios, from a more private onboard lifestyle to a seamless connection with the cockpit for social cruising. A dedicated bow lounge with convertible sunpads adds an additional outdoor relaxation area.

The flybridge is arranged as a versatile, well-zoned deck. Forward, there is a sunbathing area; amidships, a hardtop-covered space with bar and dining table; and aft, an open area left intentionally flexible for loose furniture or custom use.

The lower deck accommodates three guest cabins, including a full-beam master suite, as well as a separate crew cabin. Each guest cabin features its own en-suite bathroom, ensuring privacy and comfort for all on board. Interiors by Achille Salvagni Architetti are finished in a calm, neutral palette with natural materials, creating a refined yet welcoming atmosphere suitable for extended stays.

The GRP hull incorporates carbon fibre elements to reduce weight and improve efficiency. Twin Volvo Penta D13 engines, each producing 900 hp, deliver a top speed of up to 31 knots and a comfortable cruising speed of around 26 knots.

Azimut Fly 60 combines intelligent architecture, modern engineering and flexible layouts, offering a versatile platform well suited to both private ownership and charter use.
